

Collection Collage

Inspired by *Hannah's Collection* by Marthe Jocelyn.

Goal: Make your very own collage.

You will need:

- Background for the collage: paper, card-stock, a poster, a box, etc.
- Glue or tape
- Different objects that might include pompoms, sticks, paperclips, popsicle sticks, feathers, beads, string, rubber bands, buttons, clothespins, pebbles, leaves, etc.

What to do:

- Collect different objects to build your very own collage.
- Pick 3 or more objects to use.
- Use different quantities of each object.
- Make a picture out of your objects or randomly place your objects on the collage background. Get creative and have fun!

To think about:

- Things to try:
 - Make a design.
 - Make a pattern with the objects.
 - Make a picture with objects that all share a single attribute.
 - Group the objects on the page based on similar attribute(s).
 - Create a 3-dimensional collage.
- A collage is one way to display a group of objects. What other ways can you display a group of objects?
