

Dragon Numbers

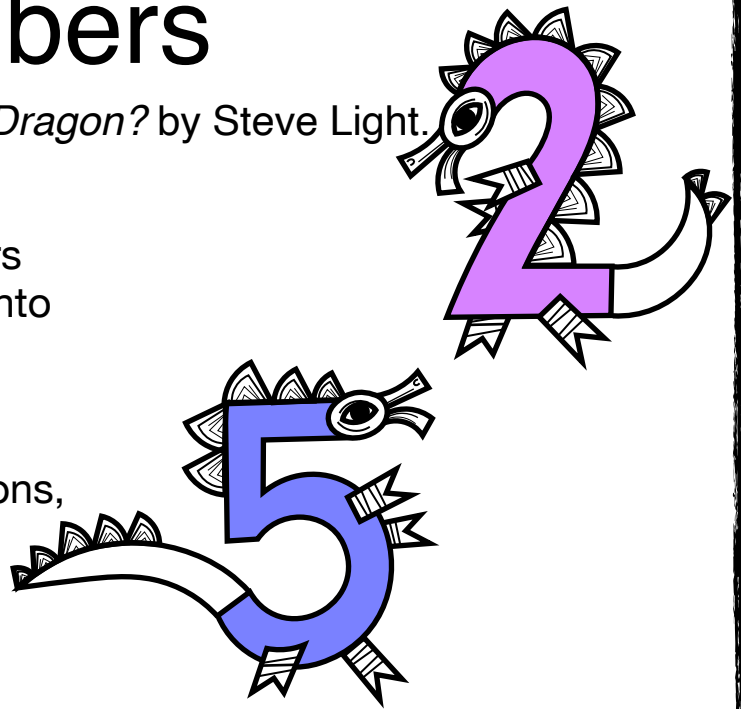

Inspired by *Have You Seen My Dragon?* by Steve Light.

Goal:

To become familiar with numbers 1-10 by transforming numbers into dragons.

You might use:

Paper, construction paper, crayons, markers, pencils, scissors, modeling clay, glue, sandpaper, glitter, felt, foam

What to do:

1. Select the number that you will transform into a dragon.
2. Create the number with the materials you want to use.
3. Add the dragon's face, tail, feet, scales, and other features. Is your dragon breathing fire?
4. Select another number to transform into a dragon.
5. If you like, create a scene or story with your dragon numbers.

Other Ways to Play:

- Roll a dice or a pair of dice to determine which number you will transform into a dragon.
- Make a dragon number line with the multiples of two (2, 4, 6, 8, 10) or the multiples of three (3, 6, 9, 12).
- Make dragon numbers with recycled materials, like cardboard tubes, packing materials, and cereal boxes.
- Make your address number or phone number with dragon numbers.
