

Kitty and Cat Made Out of Shapes

Inspired by *Kitty & Cat Bent Out of Shape* by Mirka Hokkanen

Goal: To create cats from shapes

You might use:

- Paper, pencils, pens, crayons, markers, glue, scissors
- Shape templates

What to do:

- Select a shape and decide how you will position the shape.
- Turn the shape into a cat. Draw the cat's eyes, ears, feet, mouth, whiskers, and tail.
- Decide if you want all parts of the cat to fit inside the shape or whether some parts will extend outside the shape
- Show the cat you made to someone and tell them about the shape you began with and what attributes make the shape unique.

Other things to try:

- Create other types of animals from shapes.
- Combine several shapes to make a cat or another animal.
- Make a mural that has several cats made from different shapes
- Make a mural of cats using only triangles of different sizes.
- Bend your body into a shape. What shape will you make?
